

Training: Using Satellite Imagery and Geospatial Information Technologies (GIT) to Support Cultural Property Protection (CPP) in Ukraine (Online Webinar) - Використання супутникових зображень та геопросторових інформаційних технологій (GIT) для підтримки

Análisis por Satélite e Investigación Aplicada

Plazo: 1 Jun 2024

Tipo:	Course
Ubicación:	Web-based
Fecha:	30 Nov 2023 to 17 Jun 2024 (Por confirmar)
Duración:	1 Days
Área del programa:	Satellite Imagery and Analysis
Sitio web:	http://www.unosat.org
Precio:	0,00 US\$
Correo Electrónico del Centro de Coordinación del Evento:	unosat-elearning@unitar.org
Colaboración:	UNESCO

ANTECEDENTES

With the purpose of addressing the urgent need for monitoring cultural properties, as defined under Article 1 of the 1954 Hague Convention for the Protection of Cultural Property in the Event of Armed Conflict, in Ukraine, an agreement between UNITAR and UNESCO was signed on 16 May 2022. Based on this agreement, UNESCO has been monitoring with UNOSAT, via satellite imagery, cultural property in Ukraine for damage which have – or may occur – as a result of the hostilities.

OBJETIVOS DEL EVENTO

This agreement enables UNESCO and UNITAR/UNOSAT to continue their cooperation to contribute to the safeguarding of the Ukrainian cultural heritage, and notably through the Project **“Support for Ukraine in Culture and Education through UNESCO - Emergency response for World Heritage and cultural property: damage assessment and protection”**, funded by the Government of Japan through the funds-in-trust, and in particular to the following Outcomes:

1. Continuation of the remote monitoring at the site and urban levels.
2. Reinforce in-situ damage assessment with remote monitoring.
3. Support in establishing an emergency preparedness plan for Ukrainian cities.
4. Coordination and data exchange with international partners involved in data collection.
5. **Capacity building training for the usage of satellite imagery and data interpretation.**

OBJETIVOS DEL APRENDIZAJE

At the end of the training, participants should be able to:

- Retain basic foundational concepts of: Geospatial Information Technology (GIT), Geospatial Information Systems (GIS), Earth Observation (EO) and Remote sensing (RS), Global Navigation Satellite Systems (GNSS), and satellite imagery.

- Comprehend the significance of the UN-ASIGN application, as well as understand how to use its basic functions.
- Access United Nations Satellite Centre (UNOSAT) products online.
