## Geospatial Information Technology (GIT) in Fragile Contexts

United Nations Satellite Centre UNOSAT

Type: Course

Emplacement: Web-based

Durée: 2 Days

Zone du programme: Satellite Imagery and Analysis

Site internet: https://unitar.org/sustainable-development-

goals/satellite-analysis-and-applied...

Prix: 0.00 \$US

Personne de référence de

l'évenement: unosat-elearning@unitar.org

#### ARRIÈRE PLAN

This e-learning course was created as part of the Earth Observation for Sustainable Development: Fragility, Conflict and Security project funded by the European Space Agency and aims to give a short but practical introduction to Geospatial Infomation Technology (GIT) in states affected by fragility, with a focus on remote sensing.

**NOTE-** How to access the course:

Once you register for the course, you can access the online course here: https://learnatunitar.org/course/view.php?id=408

\*For any technical assistance related to this course, please contact Ms. Sumeera Kamil (sumeera.kamil [at] unitar.org (sumeera[dot]kamil[at]unitar[dot]org))

#### CONTENU ET STRUCTURE

The e-learning course is structured into 4 modules:

- 1. Introduction to GIT in Fragile Contexts
- 2. What Can Satellites See?
- 3. GIS analysis for Fragile States
- 4. How To Use Our Online Platform (E04SDFCV)

## **MÉTHODOLOGIE**

This self-paced course promotes an interactive approach through lessons and multimedia material, stimulating critical thinking. It provides a lot of flexibility, since you will be able to complete the course at your own pace and timeframe.

Each interactive module is accompanied by a quiz.

To receive a Certificate of Completion one needs to achieve a minimum grade of 80% on each quiz.

## INFORMATIONS SUPPLÉMENTAIRES

**Technical Requirements:** The course is delivered through UNITAR's Virtual Learning Environment and participants will require a reliable internet connection throughout its duration.
