

Planet

Type:	Course
Location:	Web-based
Duration:	1 Days
Programme Area:	Environment, , Climate Change
Website:	http://www.unccelearn.org/
Price:	\$0.00
Event Focal Point Email:	unccelearn@unitar.org
Partnership:	UN CC:Learn Partnership, UNDP, Swedish Development Cooperation (SIDA)

BACKGROUND

IMPORTANT: Please register directly on the course website:

<http://unccelearn.org/>

Climate information and services (CIS) are essential for decision-making in development planning and policy. CIS refers to the collection, analysis, and dissemination of climate-related data and information to support the development of climate-resilient and low-carbon societies. CIS can be used in a wide range of sectors, including agriculture, water, health, and infrastructure. CIS can help to reduce the risks of climate change and to build resilience to its impacts. CIS can also help to reduce greenhouse gas emissions and to promote sustainable development. CIS is a key component of the climate change adaptation and mitigation strategies of many countries. CIS is a cross-cutting issue that requires the collaboration of all stakeholders, including governments, the private sector, and civil society. CIS is a rapidly growing field and is expected to continue to play an important role in the development of climate-resilient and low-carbon societies in the future.

UNDP is a leading organization in the field of climate information and services. UNDP has been instrumental in the development of the Global Framework for Climate Services (GFCS), which is a global platform for the development and delivery of climate services. UNDP has also been instrumental in the development of the National Adaptation Plan (NAP) process, which is a key component of the climate change adaptation strategies of many countries. UNDP has been instrumental in the development of the National Climate Change Adaptation Plan (NCCAP) process, which is a key component of the climate change adaptation strategies of many countries. UNDP has been instrumental in the development of the National Climate Change Adaptation Plan (NCCAP) process, which is a key component of the climate change adaptation strategies of many countries. UNDP has been instrumental in the development of the National Climate Change Adaptation Plan (NCCAP) process, which is a key component of the climate change adaptation strategies of many countries. (Kit Nicholson)

LEARNING OBJECTIVES

After completing this e-tutorial, participants will be able to:

- Define climate information and services.
- Identify the uses of climate information and services in development planning and policy.
- Discuss the role of legislation in strengthening climate information and services.
- Provide examples of instruments available to governments for mainstreaming climate information and services.

CONTENT AND STRUCTURE

The content of this e-tutorial is structured as follows: 1. Introduction to Climate Information and Services (CIS) 2. The Role of CIS in Development Planning and Policy 3. The Role of Legislation in Strengthening CIS 4. Instruments Available to Governments for Mainstreaming CIS 5. Conclusion
