Climate information and services (CIS) are defined as information and services that are used to inform decision-making on climate change adaptation and mitigation. CIS can be provided by a variety of actors, including governments, private companies, and civil society organizations. CIS can be used in a wide range of sectors, including agriculture, water, health, and infrastructure. CIS can be provided in a variety of ways, including through websites, mobile phones, and community meetings. CIS can be used to help people understand the risks of climate change and to take action to reduce those risks. CIS can also be used to help people plan for and adapt to the impacts of climate change.

UNDP is a leading provider of CIS. UNDP works with governments and other stakeholders to develop and deliver CIS. UNDP has a long history of working with governments to improve their capacity to manage risk and to plan for the future. UNDP has a strong track record of providing CIS to governments in a wide range of countries. UNDP has a strong network of partners and a strong reputation for quality and reliability. UNDP is committed to providing CIS to governments in a way that is transparent, accountable, and effective. UNDP is committed to working with governments to build their capacity to manage risk and to plan for the future. UNDP is committed to providing CIS to governments in a way that is transparent, accountable, and effective. (Kit Nicholson)

Objectives

After completing this e-tutorial, participants will be able to:

- Define climate information and services.
- Identify the uses of climate information and services in development planning and policy.
- Discuss the role of legislation in strengthening climate information and services.
- Provide examples of instruments available to governments for mainstreaming climate information and services.

Introduction

Climate change is a global challenge that requires a coordinated response. Climate information and services (CIS) are essential for understanding the risks of climate change and for taking action to reduce those risks. CIS can be used in a wide range of sectors, including agriculture, water, health, and infrastructure. CIS can be provided in a variety of ways, including through websites, mobile phones, and community meetings. CIS can be used to help people understand the risks of climate change and to take action to reduce those risks. CIS can also be used to help people plan for and adapt to the impacts of climate change. UNDP is a leading provider of CIS. UNDP works with governments and other stakeholders to develop and deliver CIS. UNDP has a long history of working with governments to improve their capacity to manage risk and to plan for the future. UNDP has a strong track record of providing CIS to governments in a wide range of countries. UNDP has a strong network of partners and a strong reputation for quality and reliability. UNDP is committed to providing CIS to governments in a way that is transparent, accountable, and effective. UNDP is committed to working with governments to build their capacity to manage risk and to plan for the future. UNDP is committed to providing CIS to governments in a way that is transparent, accountable, and effective.

UN CC:Learn is a partnership of more than 30 multilateral organizations supporting countries to design and implement systematic, recurrent and results-oriented climate change learning. At the global level, the partnership supports knowledge-sharing, promotes the development of common climate change learning materials, and coordinates learning interventions through a collaboration of UN agencies and other partners. At the national level, UN CC:Learn supports countries in developing and implementing national climate change learning strategies. Through its engagement at the national and global levels, UN CC:Learn contributes to the implementation of Article 6 of the UNFCCC on training, education and public awareness-raising, and the 2012-2020 Doha Work Programme. Funding for UN CC:Learn is provided by the Swiss Government and UN partners. The Secretariat for UN CC:Learn is hosted by the UN Institute for Training and Research (UNITAR).
