Worldwide, road traffic injuries claim more than 1.35 million lives each year with a disproportionate impact on health and development. They are the ninth leading cause of death across all age groups globally and the leading cause among young people aged between 5 and 29 years. Nearly 3,700 people die on the world's roads every day.

The adoption of policy and legislation on risk factors associated to traffic crashes—such as speeding, drink-driving, distracted driving, the use of helmets, seatbelts and child restraints, is essential to improve road safety.

At the same time, strengthening the individual and institutional capacities of law enforcement officers and relevant stakeholders to implement innovative interventions that reduce the number of road traffic injuries and fatalities related to drivers using alcohol is essential.

The e-Learning course “High Visibility Enforcement Interventions: Law Enforcement to reduce road traffic crashes related to drivers using alcohol” aims to serve as a tool for government officials to help them design programmes and interventions that contribute to achieve Global Road Safety Performance Target 9: By 2030, halve the number of road traffic injuries and fatalities related to drivers using alcohol.

The e-Learning course aims at raising awareness, creating knowledge and improving performance on. the following areas:

- The UN Decade of Action for Road Safety- Pillar 4 Safer Road Users

- The Global Road Safety Performance Targets and Sustainable Development Goals (SDGs) related to road safety
- The use of the High Visibility Enforcement (HVE) as an approach to change road user behaviour and reduce road traffic injuries and fatalities related to drivers using alcohol

Objectives

By the end of this e-Learning course, participants will be able to:

- Describe the UN Decade of Action for Road Safety, particularly Pillar 4 - High Visibility Enforcement (HVE)
- Explain the concept of HVE and its impact on road traffic injuries and fatalities related to drivers using alcohol
- Describe the HVE approach and its implementation in different countries
- Explain the role of HVE in achieving the Sustainable Development Goals (SDGs) related to road safety
- Describe the HVE approach and its implementation in different countries
- Explain the role of HVE in achieving the Sustainable Development Goals (SDGs) related to road safety
- 2030 target, related to road safety, and the role of HVE in achieving it

EN:

At the end of this e-Learning course, participants will be able to:

- Describe the UN Decade of Action for Road Safety, particularly Pillar 4

- Recognize the 12 Global Road Safety Performance Targets and SDGs related to road safety
- Adapt and apply the HVE approach with extensive communication, education, and outreach to their respective contexts
- Identify and integrate key stakeholders to address road safety
- Develop minimum indicators to monitor progress towards the achievement of the Global Road Safety Performance Target 9: By 2030, halve the number of road traffic injuries and fatalities related to drivers using alcohol

Objectives

By the end of this course, you will be able to:

- Module 1: Identify the 12 Global Road Safety Performance Targets and SDGs related to road safety
- Module 2: Explain the HVE approach and its components
- Module 3: Analyze the "Conduce sin Alcohol" programme in Mexico
- Module 4: Analyze the "Tomatelo en Serio" programme in the Dominican Republic
- Module 5: COVID-19: Good practices and precautions when using Breathalyzers

EN:

The course is comprised of 5 modules:

- Module 1: Road Safety as a Sustainable Development Priority
- Module 2: What is a High Visibility Enforcement Intervention?
- Module 3: Case Study: Mexico "Conduce sin Alcohol" programme
- Module 4: Case Study: Dominican Republic "Tomatelo en Serio" programme
- Module 5: COVID-19: Good practices and precautions when using Breathalyzers

International Road Traffic Law Enforcement Agency (IRLEA) is a global organization that provides training and support to law enforcement agencies in various countries. The agency focuses on road safety and traffic law enforcement, aiming to reduce road accidents and improve traffic management. IRLEA offers a range of courses and programs, including interactive lessons, additional readings, and learning materials. Short quizzes are used to evaluate learning objectives and ensure that participants have a good understanding of the material. The agency also provides technical assistance and advice to law enforcement agencies, helping them to improve their road safety practices and traffic law enforcement procedures.

EN:

The course includes interactive lessons supported by additional readings and learning materials, coupled with short quizzes to evaluate learning objectives.

EN:

The course is designed to provide law enforcement officers and public officials with the knowledge and skills needed to improve road safety and traffic law enforcement. The course covers a range of topics, including road safety, traffic law enforcement, and the role of law enforcement agencies in road safety. The course is delivered through a combination of interactive lessons, additional readings, and learning materials. Short quizzes are used to evaluate learning objectives and ensure that participants have a good understanding of the material. The course is also open to any practitioner or interested person who is willing to acquire greater knowledge and ease in handling road safety related issues.

EN:

Direct beneficiaries of the online course will be law enforcement officers and public officials responsible for road safety.

The course is also open to any practitioner or interested person who is willing to acquire greater knowledge and ease in handling road safety related issues.
